

SUPER AIR NAUTIQUE 210

The Super Air Nautique 210 is the smallest member of Correct Craft's Air Series. Redesigned for 2007, this boat boasts an impressive 98" beam for an expansive interior and an overall length (without platform) of 21 feet so it is easily trailerable. Like its predecessor, the 210 wake features an aggressive lip for massive air; however, the trough has been virtually eliminated.

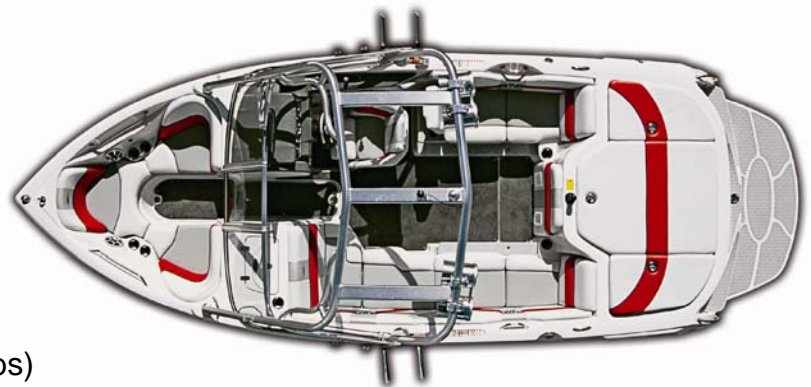

With a 10 passenger capacity, the 210 features arena style seating including an

optional portside flip up seat back and a removable lean back to starboard. The port and starboard rear hatches and seat bases provide ample storage for boards and gear.

Hardcore wakeboarding enthusiasts will appreciate up to 900 pounds of optional factory ballast below deck and a choice of optional towers.

For big air in a small package, the Super Air Nautique is the boat to choose.

Length Overall:	23' 3.5"
Length w/o platform:	21'0"
